04/13/2024
[c] 6.10.86.1301
[+] Increased polling interval for older control units, for example SRS IDECU 7000. The maximum exchange rate with the unit is approximately 1 op/sec.
[+] For control units with a bitrate below 100 baud, the delay for communication is 300 ms
[+] Setting the exchange rate for protocols has been moved to the technical parameters section. It is not recommended to change unless necessary.

03/31/2024
[c] 6.10.85.1298
[!DB] Correcting errors in the database
[+]Adding a control interval after reading identifiers via the MMC SCI protocol

04/27/2023
[c] 6.10.84.1294
[!] Russian language by default on first launch
[!DB] Fix in ABS error codes
[!] Correction of the time grid on charts

20.12.2022
[v] 6.10.83.1281
[!] Fixed selection of a directory for storing logs
[!] Added ability to ignore ISO-9141 connections for cars before 2000

01.10.2022
[v] 6.10.82.1281
[!] Fixed state of the "stop" button in a new session
[!] Fixed initialization of the table of error codes, which led to the expansion of service information.
[!] Stopping the session by the user is no longer accompanied by a preliminary warning about the loss of connection

09/27/2022
[v] 6.10.81.1277
[!] Updated help
[-] Removed automatic adjustment of polling rate on charts
[!] Enabled ignoring the response of the commission for the conclusion of tests according to the old protocols

09/17/2022
[v] 6.10.80.1271
[!] Added manual option for selecting a COM port for the adapter
[!] Changing the firmware of the MMC K-Line Advanced adapter
[!] The driver for the MMC K-Line Advanced adapter is included in the executable file
[-] Manual change of speed in charts is removed, only profit is left
[+] Added increased speed on the options tab

09/10/2022
[v] 6.10.79.1256
[!] Fixed interface for Windows XP
[!] Fixed auto-detection of MMC K-Line Advanced adapter based on CH340 chip on Windows XP, Windows 7
[!] Bitrate search everywhere is done in descending order

04.09.2022
[v] 6.10.78.1256
[!] Testing of the MMC K-Line Advanced adapter based on the CH9340 chip (designed to work on Windows 10 only)
[!] The logic for bypassing all possible bitrates - from higher to lower - has been changed for the MMC K-Line Advanced adapter

08/21/2022
[+] Added auto speed for charts

08/07/2022
[v] 6.10.77.1217
[-] Disabled support for K-Line adapters of all types
[-] Disabled support for J2534 adapters
[-] Removed technical logging
[-] Checking for new versions has been abolished

```
63    [-] Removed sending technical information to developers
64    [-] Removed graphics performance check
65    [-] The built-in ability to update the software of MMC-Wireless adapters has been
      removed
66    [-] Exporting reports in MS Excel format has been removed
67    [!] The software is delivered as a single executable file and can be run from
      anywhere on the disk
68    [-] Removed control panel for protocol technical settings
69
70    ;history.txt - version history file
71    ;[+] - additions
72    ;[!] - changes
73    ;[v] - version
```
